## Accessories for Rectangular Gauge Blocks over 100 mm SERIES 516

- Specially designed for long rectangular gauge blocks of 100 mm and over which have two coupling holes in the body: coupling of two long gauge blocks, a stack of regular gauge blocks and attachment of jaws is possible.
- These accessories can be used for long steel or CERA blocks.

## SPECIFICATIONS

## Connector A 619031

Used for directly coupling two long gauge blocks.

## Connectors B and C

| :---: | :---: | :---: | :---: | :---: |
|  | Order No. | $\ell$ (max.) | L | Adapter Qty |
| Connector B | 619032 | 90 | 126 | 2 |
| Connector C | 619033 | 200 | 236 |  |

## 0 <br> Adapter (2 pcs.) 619036

Used for clamping jaws to the ends of one or more long gauge blocks in conjunction with adapters (619036). The length $\ell$ is highly adjustable to accommodate the variable length of a stack of regular gauge blocks that would be wrung to one of the long gauge blocks to achieve the required gaging size.

Coupling holes in long gauge blocks

Using an A-type connector

Use of B-type connectors in gage construction

Setting a dial test indicator to a long-gaugeblock stack attached to the base with a D-type connector

## Connector D

Used for attaching a long gauge block directly to the base.

## Connector E

Used for attaching a long gauge block to the base over a stack of regular gauge blocks wrung between the base and long gauge block. The length $\ell$ is highly adjustable to accommodate the variable length of the stack.

## Base

## Example of use of accessories with long gauge blocks

The table below shows the appropriate combination of long rectangular gauge blocks and accessories for making inside and outside measurements in the approximate range 300 mm to 1000 mm in 100 mm steps. The numbers in the table represent the number of gauge blocks or accessories in use. Note that the ranges shown do not take into account the combined thickness of the half-round jaws for inside measurement ( 24 mm ) and the length of any regular gauge block stack used.
