MeasurLink ENABLED
Data Management Software by Mitutoyo

Products equipped with the measurement data output function can be connected to the measurement data network system MeasurLink (refer to page A-5 for details).

ABSOLUTE™

An inspection certificate is supplied as standard. Refer to page U-11 for details.

- The ABS (absolute) scale restores the last origin position* automatically when the indicator is turned on.
- * Regarding origin setting, refer to "Origin Setting of Digimatic Indicators" on page F-25.
- Thanks to Mitutoyo's ABSOLUTE Linear Encoder, reliability has been increased due to elimination of over-speed errors.
- Tolerance judgment can be performed by setting upper and lower tolerance limits. The judgment result (go/no-go) can be displayed in full-size characters.
- Battery life of approx. 7,000 hours in continuous use has been achieved with only one battery.
- Equipped with a data output port that enables incorporation into measurement networking and statistical process control systems (refer to page A-3).

Standard Type

Large LCD

The large LCD incorporates 11 mm characters giving 1.5 times the character area of conventional products (which display 8.5 mm characters) making measurement values much easier to read.

Actual size

Three large buttons

The popular three-large button design, which is used in products such as the ABS coolant proof Digimatic indicators ID-N/B, makes buttons easier to press and operations easier to perform.

- Power switch
- Data output (when connected to an external device)
- Data hold (when no external device is connected)

- Parameter setting mode
Count direction switching, tolerance judgment setting, resolution switching, scale factor setting, and function lock setting
- inch/mm conversion (inch/mm models)

330° rotary display

The display can be rotated 330°, allowing use at a position where you can easily read the measurement value.

Calculation: f(x) = Ax

Mounting the ID-CX on a measuring jig and setting the multiplying factor (to any practical value) allows direct indication of size (see example below) without using a conversion table and so improves measurement efficiency.

Usage example
Note: The measuring jig is not supplied with the ID-CX.

Function locking

Ensures reliability of measurement by locking the settings to prevent preset function settings from being changed by mistake.

Technical Data

- Display: 6-digit LCD, sign
- Battery: SR44 (1 pc.), **938882** for initial operational checks (standard accessory)
- Battery life: Approx. 7,000 hours of continuous use. Approx. 1.2 years under normal use. Note: Depends on use of the indicator. The above values are reference values.
- Maximum response speed: No limit (except for scanning measurement)
